Box No. I      Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  
☐ This opinion has been established on the basis of a translation from the original language into the following language \_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material  
☐ a sequence listing  
☐ table(s) related to the sequence listing
  - b. format of material  
☐ in written format  
☐ in computer readable form
  - c. time of filing/furnishing  
☐ contained in the international application as filed.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

Priority

1. ☒ The following document has not yet been furnished:

☒ copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date in the claimed priority date.

2. ☐ This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

3. Additional observations, if necessary:

2. Citations and explanations:

The present invention relates to a synergistic fungicidal mixture of (I) and (II) according to claim 1. D1 (EP 0988790) describes more general synergistic fungicidal compositions, with a plurality of possible selections for the two constituents. The present invention is encompassed in D1, however.

None of the examples of D1 describes the claimed composition. The present application satisfies the criterion in PCT Article 33(2) because the subject matter of claims 1-10 is novel in relation to the prior art as defined in the Regulations (PCT Rule 64.1 to 64.3).

Since D1 discloses a plurality of examples with relatively small differences in comparison with the present invention, it would be expected *prima facie* that the claimed composition has a synergistic effect.

Although synergism is considered in principle as not predictable, a person skilled in the art would obtain sufficient information from D1 to expect that certain variations would likewise lead to the desired effect. However, the present application contains comparative experiments in which the most similar explicitly

mentioned compounds of D1 are employed. These experiments demonstrate clearly that the selection made in accordance with the invention not only makes it possible to achieve a synergistic effect, but also that an improved synergistic effect over the most similar compositions of D1 can be obtained. This improvement could not have been expected. The present application satisfies the criterion in PCT Article 33(3) because the subject matter of claims 1-10 involves an inventive step (PCT Rule 65.1 to 65.2).

The present application satisfies the criterion in PCT Article 33(4) because the subject matter of claims 1-10 is considered industrially applicable.

It is assumed that all claims enjoy priority. Should this later prove not to be the case, the document cited under item VI hereinbelow could become relevant for assessing whether the criteria of PCT Article 33(1) have been satisfied.
